- Javascript

PROJECTS

Click Eat

May 2023 | github.com/Dayhun/ClickEat

A web project built with PHP, SQL, and CSS, offering a delightful food delivery experience. Browse a variety of restaurants, explore detailed dish information, and effortlessly place orders.

Memory Jar

April 2023 | github.com/MemoryJarTeam/Memory_Jar/tree/mainReact

A captivating web project powered by React and Javascript server. Create your personal time capsule, storing cherished memories within a virtual jar that unlocks at your chosen time.

Dish Dig

June 2023 | github.com/LeticiaMatosGuerra/FinalProject

A delightful web project built with Vue, PHP, and an external API. Explore a vast collection of recipes by searching ingredients or names. Save your favorites to your profile for easy access later.
